Top level technical training that focuses on Security

COMPANY

We specialize in securing not only operating systems, but also applications and networks. Our experts have expertise in commercial, health care, financial, governmental, & military environments. We also offer support with Certification and Accreditation in the DoD, DOE, and other federal agencies using DIACAP, NIST, NIACAP and other C&A processes.

SERVICES

Connecting your business to the security resources you need!

WHAT WE DO

The combination of Real World experience, Research & Development, and out-of-the-box thinking puts us far above the rest!

- Consulting
- Computer Forensics
- Incident Response
- Reverse Engineering
- Compliance Testing
- Ethical Hacking
- Espionage Countermeasures
- SCADA Security
- Top Level Training

DIGITAL FORENSICS

Computer forensics is becoming an increasingly important part of doing business. We offer expertise in incident response, e-discovery, digital forensic investigation, and litigation support. Our highly trained and certified personnel have experience working with events ranging from corporate espionage to international cyber extortion.

ETHICAL HACKING

Red Team penetration testing capability is available with a wide range of focus. Our services range from PCI compliance testing to complete physical, cyber, and procedural security validation. The goal of this service is to emulate adversaries, test the current state of security in your organization, and report weaknesses along with providing solutions to mitigate those risks.

PREMIER TRAINING

Our educational solutions range from set locations for public courses to on-site and online solutions to deliver the best service in the industry. CISSP, ISSAP, ISSMP, CAP, CISM, CEH, CCE, Security+, and many more. Call us today to find out about availability and pricing!
